2017-19

USFDA site approval I & II

2020

State-of-the-art Production Block-2

2023

China approval
First Filing in CADIFA, Brazil - Olmesartan Filed. 6 more products are under filing.

2024

CEP approval received for 2 APIs
ECOVALID (application/certification)

Integrated Approach

- CDMO/CMO Intermediates, KSM & APIs
- API - Speciality Chemicals Innovators & Generics
- Specialty Chemicals
- CRO - FTE Basis (New Molecules)

Approximately 80,000 sq. Meters of land is available, and dedicated blocks for CMO Activities can be built under partnership module.

Backward Integration leads to cost Competitiveness / supply reliability and quality control

No. of US DMFs Filled – 10
Under Filing (FY'25) - 4

No. of CEPs Filled – 8
Under Filing (FY'25) - 4

“Delivering Best Quality and Cost Leadership in supply of Intermediates & APIs to the Customers globally & achieving highest Customer satisfaction”

Production Block Highlights

- 1 Production Block-1 (PB-1) Equipment Capacity -162 KL
- 2 Production Block-2 (PB-2) Equipment Capacity -123KL
- 3 Total Plant Equipment Capacity –350 KL Addition of 50 KL existing block and new 150 KL new block under finalization
- 4 Number of Clean rooms – 6, All are Class 100,000 (ISO-8) Certified

Successfully inspected/approved by US FDA – 2019 & 2017.

Successfully inspected/approved by EDQM.

On- going DMF/CEP filing activity for various products across the globe.

Japanese Accreditation issued by Ministry of Health, Labour and Welfare.

R&D Infrastructure

Our advantage:

- Nine World-Class Research and Analytics Laboratories that support and facilitate new Product Development.
- Modern instrumentation, computer systems safety equipment and database access.
- Features lab centrifuges, weighing balances, hot air sources, and vacuum ovens.
- Separate area dedicated to the development of high-pressure reactions.
- Pilot plant conveniently located on the same site.

- 1 Telescopic processes to reduce the product losses and to improve the scalability of the products.
- 2 Process intensification to improve the efficiency of process.
- 3 Early building blocks , which will convert to advanced intermediates and final APIs via various organic synthesis routes.
- 4 Application of cost-effective methodologies.

Environment Health Safety and Sustainability

VNAI is committed to:

- To establish a secure and hygienic workplace to prevent job-related injuries and illnesses, as well as safeguard the environment by preventing pollution.
- To comply with all applicable legal, statutory, regulatory, and other requirements related to Environment, Occupational Health, and Safety.
- To identify and eliminate hazards and mitigate OH&S risks.
- To prioritize safety, occupational health, environment, and quality in all of our business operations, our company firmly believes in providing ample resources to uphold these standards and ensure our commitment to excellence.

Key Highlights

- Installed Zero Liquid Discharge System (ZLD) Effluent Treatment Plant (ETP), Circular Disc Reverse Osmosis (CDRO), Multiple Effect Evaporation(MEE) And ATFD.
- Installed Solar Energy Plant having capacity up to 1000KW.
- Installed Multi-Stage Scrubber system to control the fumes from various reactions.
- Occupational Health Center (OHC) and Ambulance facility is available in case of emergency.
- ISO – 14001 (Environmental Management System) and ISO – 45001 (Occupational Health and Safety Management Systems) Certified.
- Installed Roof mounted fire extinguishers, Smoke detectors,N2 blanketing systems, Flame Arresters

Handling of Foreign Particles, Insoluble Matter, Black Particles in APIs

Source, Controls & Preventive Methods

01 Process & Equipment particles

1. Charcoal,
2. Fibers from filters,
3. Fibers from centrifuge bags,
4. Inorganic salt used or formed,
5. Seal/gasket materials,
6. Construction material of equipment (stainless steel, glass from glass lined reactor, PTFE)

02 Fibers

1. Fibers have typically diameter of less than or equal to 40 microns.
2. Length: Diameter ratio larger than 3 : 1

03 Support equipment

1. Selected for their inertness and compatibility with the process and cleaning conditions.
2. Eg: scoops, personal protective equipment like gloves, clothes and filter masks.

04 (Controls) Removal/detection Methods

1. In-line filters (bag filters, cartridge filters)
2. In-line detectors
3. In-line separators (for continuous process)
4. Use of sampling and/or In-process control

05 Atypical particles

1. These are particles that should not be present in final API and their presence should always trigger an investigation.
2. These particles consist of foreign matter which is not intended / designed to be in direct contact with the product / manufacturing process.

VNAI is gearing up for new Segment Nutraceuticals

Nutraceuticals are products derived from food sources that are purported to provide extra health benefits, in addition to the basic nutritional value found in foods.

Product list for Nutraceuticals

Ingredients Name	CAS Number	Recommended as	Recommended / Used for
Orotic Acid	65-86-1	Orotic Acid as Nucleoside Phosphate Precursor	Further Used for synthesis of Uridine 5-Monophosphate (UMP), Uridine Diphosphate (UDP), Uridine Triphosphate (UTP).
Calcium Orotate	22454-86-0	Food Supplement/Nutritional supplement	Calcium Orotate Tablet is nutritional supplement which is used to treat or prevent calcium deficiency in pregnancy and lactation, postpartum care, post menopausal women, osteoporosis and low back pain.
Magnesium Orotate	34717-03-8	Food Supplement/Nutritional supplement	This medication is a mineral supplement used to prevent and treat low amounts of magnesium in the blood. Some brands are also used to treat symptoms of too much stomach acid such as stomach upset, heartburn, and acid indigestion.
Beta-Carotene	7235-40-7	Dietary Supplement/Vitamin	Immune modulation, antiaging effects, and the prevention of both cancer and cardiovascular disease
