

An IMS (ISO 9001:2015, ISO 14001 : 2015,& ISO 45001:2018) Certified Company

Pharmaceutical Intermediates

The Pharmaceutical Intermediates are primarily used to manufacture Active Pharmaceutical Intermediates or Bulk Drug Intermediates, which are used in formulation of life enhancing and life saving medicines.

Based on our years of experience, technical innovation and long term research, Viswaat has been involved in developing and manufacturing quality pharmaceutical intermediates Our prime objective is to obtain customer satisfaction with superior quality products.

VISWAAT's commitment to Research & Development has been duly acknowledged by the Ministry of Science & Technology, GOI and R & D Facility of Viswaat is approved under Department of Science & Industrial Research. Viswaat's Manufacturing Site at Ambernath is a Together for Sustainability (TFS) certified facility.

Product Name	Chemical Name	CAS Number	Application
2 - Chloroethanol	2 - Chloroethanol	107-07-3	Active pharmaceutiucal intermediates (Cetirizine, Cetirizine Hydrochloride, Benzothonium Chloride, Preparation of intermediate of Silodosin) and dye intermediate
2-(2-Chloroethoxy) Ethanol	2-(2-Chloroethoxy)Ethanol	628-89-7	Active pharmaceutiucal intermediates (Quetiapine fumarate, Hydroxyzine, Cetirizine dihydrochloride) and Organic Synthesis
2 - Diethyl Amino Ethanol	2 - Diethyl Amino Ethanol	100-37-8	Active Pharmaceutical Intermediates, Ion Exchange Resins
2 - (2- DiethylAmino Ethoxy) Ethanol	2 - (2- DiethylAmino Ethoxy) Ethanol	140-82-9	Active Pharmaceutical Intermediates, Cosmetics
1-Dimethylamino 2- Propanol	1-Dimethylamino 2- Propanol	108-16-7	Active Pharmaceutical Intermediates, Cosmetics
2 - (Di-isopropylamino Ethanol	2 - (Di-isopropylamino) Ethanol	96-80-0	Active Pharmaceutical Intermediates (Benzamide preparation) used as a speciality neutralizing amine with markedly superior corrosion inhibiting properties)
N -(2-Hydroxyethyl) Morpholine	N -(2-Hydroxyethyl) Morpholine	622-40-2	Active Pharmaceutical Intermediates and in pharmaceutical formulations (analgesics, local anesthetics, antiboitics, antiplaque)
– (2- Hydroxyethyl) Pyrrolidine	– (2- Hydroxyethyl) Pyrrolidine	2955-88-6	Active Pharmaceutical Intermediates.
N - (2 - Hydroxyethyl) Piperidine	N - (2 - Hydroxyethyl) Piperidine	3040-44-6	Active Pharmaceutical Intermediates, Organic Synthesis
N - (2 - Hydroxyethyl) Piperazine	N - (2 - Hydroxyethyl) Piperazine	103-76-4	Active Pharmaceutical Intermediates (Fluphenazine - antipsychotic agent) Polyurethane catalyst. Bulk drugs , Veterinary drugs.
Isopropoxyethanol	Isopropoxyethanol	109-59-1	Used in the synthesis of Bisoprolol Fumarate
